

Hilario Chaves  
20 year old farmer  
525 mt<sup>2</sup> plot  
high value crop &  
staple crops

MásRiego - Guatemala's largest drip irrigation project

Promote other practices: crop rotation & crop diversification  
high value crops, staple & indigenous crops

# Increase sales and encourage farmers to make food security oriented decisions

Before drip : 1200 pounds  
After drip & other practices : 2400 pounds  
Sales increase of USD: \$485

Encourage female head of the household participation

Hilario's wife Sandra and their son

Sandra helps Hilario maintain the plot during all stages: seedling, irrigation, fertilizing and harvesting.

## Female community member participation

Female employment: Hilario's plot provides work to 4 women during the harvest season

We #endhunger by  
partnering with farmers  
to solve challenges
